Python scripting via the .NET API. This capability was introduced in AutoCAD 2004. Python scripting has been integrated with the .NET API and X++ so that code can be written in Python. AutoCAD 2011 introduced a new scripting language, called "X++". X++ is a dynamic-link library, which is included as a component in the AutoCAD environment. X++ can be used to automate drawing steps, access functions not available from the traditional scripting languages, and can also be used to extend AutoCAD with new features. X++ is based on the AutoLISP programming language. Although AutoCAD supports importing most popular office documents in plain text format, this capability was lost in the 2007 release of AutoCAD. Starting with AutoCAD 2009, it is possible to import most common office file formats. The import feature is available through the API in the 2010 release of AutoCAD. AutoCAD supports exporting to SVG, a vector image format used in web development. Operating systems AutoCAD is available for Mac OS X, Microsoft Windows and Linux. Microsoft Windows editions were made available for both x86 and x64 processors. AutoCAD LT 2011 and 2012 editions are x86-only versions. Windows Server 2008 is required for the 64-bit editions. AutoCAD can also be run from a flash drive or DVD as an installation from which to run using the "Run" functionality. File formats AutoCAD supports most common drawing and modeling file formats, including ASCII, CSV, DXF, DWG, DGN, ETRS, DGN, FAX, IGES, JPG, KML, PDF, PLY, PS, SXF, SWC, SWF, SWF, WMF, WPL, XML and XAML. Several AutoCAD extensions were developed to add functionality such as the development of CAD assembly and part libraries. Among the most popular CAD assembly extensions are Mitsui, that provides information on the geometry, components, materials and operations, and FOT, which provides information on the processes used in the fabrication of the parts. AutoCAD/Architectural products can export the 2D drawing to a DWG/DXF format. The AutoCAD/Structural products include DGN/DWG file format export. The new AutoCAD/PLM products can export the 2D drawing to the DXF and PL 5b5f913d15
