It lies 30 km southeast of Würzburg, 20 km northeast of Heilbronn, and 65 km northwest of Frankfurt am Main. The oldest parts of the town were built in Roman times. The historic center is preserved and listed as part of the UNESCO World Heritage Site "Old Rheinische Wallraf-Richartz Museum". The town is home to a number of breweries, such as that of the Dr. Müller brewery in the Hagen town center, which produce Hagen's best-known beer, Hagen Schlenkerla Pilsener. On the north and south sides of the town are the villages of Derndorf, Schulzendorf and Scheffau, all part of Hagen. “Cloud-based employee attendance software” The application is tailored for small to medium-sized businesses A business manager can create an unlimited number of users, assign them different permissions and import employees data from a CSV file The attendance can be logged by the employees themselves or by managers and the web-based application can be accessed from any device that is connected to the Internet Advantages Hassle-free worktime tracking Easy data access and reporting “Time attendance management” ClockSimple does not require third-party assistance “Easy access to data from any device with Internet access” Disadvantages Has some limitations, such as complicated time reporting and recording FAQs What’s the biggest problem you face with your worktime tracking system? The biggest problem is the complexity of reports, as the reports must contain a lot of information on the work that was done and how much money is expected to be paid. How does ClockSimple solve this issue? Clocksimple features a built-in calendar that provides users with a visual representation of the work schedule. Moreover, the application enables employees to track time offs, holidays and leave and it is able to log the day/month and year when the time off occurred. Which are the core benefits of using ClockSimple? Our software provides several benefits to small businesses: Hassle-free worktime tracking Easy data access and reporting "Time attendance management" Data access and reporting from any device with internet access How does ClockSimple compare to other time tracking apps available? In my opinion, ClockSimple is the best time tracker as it is very easy to set up and log in. It is a web-based application that can be accessed from any device with Internet access. With ClockSimple, there is no need to log in and the user can remain anonymous. It has many other features that make work scheduling and tracking much easier for both the employees and the managers. Is it possible to have the same benefits, if you're using an outdated time tracking system? If you're currently using an outdated time tracking system, I would advise against it. The biggest problem with it is that it will only cater to specific tasks (time tracking) and is not a comprehensive system. How does ClockSimple compare to other time

What's New In ClockSimple?

Description Design and coding Designed to meet the requirements and need of all businesses, regardless of their size, ClockSimple provides a cloud-based employee attendance software tool that allows both worktime logging and quick payroll calculation. Not only that it stores data in the cloud but it also provides web-based access of employees and managers from either computers or smart phones, making worktime tracking much easier. User-friendly worktime logger for employees The ClockSimple desktop application enables employees to clock in as they start their shift and clock out when the working hours are over. They can check their account and work times, adding new work hours and attaching notes to their accounts. ClockSimple also features integrated GPS tracking so as to check the location of the employee that logs their working hours from a portable device, such as the personal phone. Both iOS and Android devices are supported. Comes in handy to all HR managers Prior to using the application, a company account must be created by authorized personnel. There are four categories to choose from, namely M1, S2, J1 and W1, each with its own permissions and feature set. The general one is M1, so it is probably the one most companies should opt for. The information for all the departments and all the employees is conveniently logged, also taking into account paid time off and sick times, vacations and holidays. All the data is displayed in a structured manner, in tables with multiple columns and additional filtering criteria, such as the time range, the department, the job tile, or the name of the employee. Human resources managers can instantly check who is currently at work and track the work hours for all the employees. Reports on all the stored information can be generated with a click and saved locally either to a spreadsheet file or as a PDF. In other words, ClockSimple can also act as an auditing tool and a payroll tracker for managers. A time attendance tool with additional benefits The purpose of ClockSimple is to make worktime scheduling and tracking much easier for both the employees and the managers. It can track regular working hours, tasks, jobs and shifts, it handles overtime and allows job assigning to employees. The generated reports are comprehensive and comprise details about the work attendance of all the employees, allowing payroll automation and expense control.
